CODEGREEN ITM

RELEASE 2026.09.7

NEW FOR THE BIG JOBS

One big job.
Shared by the whole crew.

Split a large property into areas, give each technician their part, and send one report signed by everyone who did the work. Office and phone, iPhone and Android.

SHARE THE JOB

Technicians and areas Fire alarm

Area	Devices	Owner
First Floor	28	Luis Ortega (lead)

CODEGREEN ITM

MULTI-TECHNICIAN

One big job.
Shared by the crew.

Add helpers to a fire alarm job and give each of them areas of the building. Answers sync between phones as you work, and the lead submits once for everyone.

Hand an area to someone else mid-job. They see exactly what is left.

Fire and life safety inspection software.
Built by people who do this work.

PROPERTIES

Divide a big building into areas.

Name the parts of the property, set their order, and file equipment into them one at a time or many at once, by panel, by loop or by floor.

Once a property has areas, every list gets an Area filter, on the office and the phone.

Fire and life safety inspection software.
Built by people who do this work.

REPORTS

Every technician signs for their work.

On a shared job the signature page has a place for everyone who tested a device or found a deficiency, with the areas they signed for. Switch on area headings and who tested what.

REPORT SWITCHES

INITIATING DEVICES

Second Floor · tested by Sarah Whitman

Device Type	Address	Result
Smoke Detector Location: Room 214, ceiling center	2-014	PASS
Manual Pull Station Location: Stair B landing	2-015	PASS

CERTIFICATION

REPORTS

Every device, one block.

Each device on a report reads as one block: its results on one line, its location written out in full underneath.

EVERY REPORT

INITIATING DEVICES

FACU (Fire Alarm Control Unit) · Electrical Closet

Device Type	Address	Loop	Visual	Functional	Result
Smoke Detector Location: Main lobby, above reception desk	1-001	1	PASS	PASS	PASS

OFFICE ON YOUR PHONE

Run the day from the truck.

Open the office on a phone and it shows the jobs that matter now: book a new inspection, change the technician or reschedule, without hunting through menus.

FIELD APP, PROFILE

Open the Office

Admins and managers open the office from the field app's Profile, straight to today's inspections.

Full office	every page, one tap
Set as default	open on your tab

Full office is one tap away, with every page.

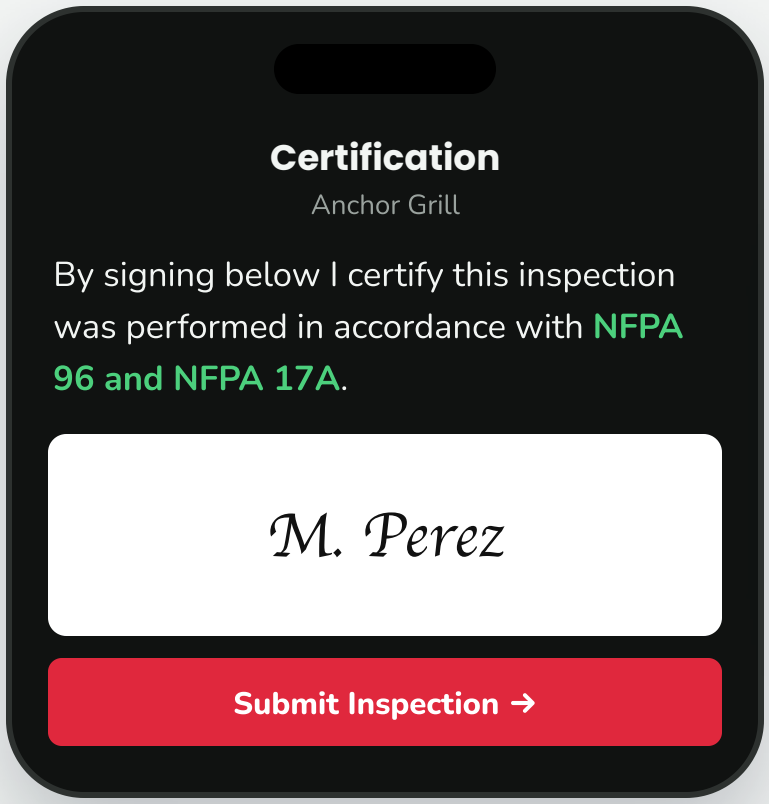

Fire and life safety inspection software.
Built by people who do this work.

KITCHEN HOODS

Hood suppression cites NFPA 17A.

The wet chemical system is covered by NFPA 17A and the hood it protects by NFPA 96. Suppression reports, signatures, new deficiencies and the invoice text now cite both.

Fire and life safety inspection software.
Built by people who do this work.
