Code-Green ITM

What's new in CodeGreen

Release 2026.10.2. Five new security inspection programs, each with its own report:

- **Intrusion Alarm**
- **Video Surveillance**
- **Camera Cleaning**
- **Access Control**
- **Intercom**

Life safety and security, one app for the whole building. Plus NFPA 72 system types, pull station covers, bigger equipment libraries and resolving deficiencies with no signal.

Release 2026.10.2 · October 2026 · CodeGreen ITM, LLC

SECURITY INSPECTIONS

Five new programs, one familiar workflow

Life safety and security, one app for the whole building. Each is its own service your company switches on: add it to a property's inspection types and schedule it like any other service, on iPhone, iPad, Android and in the office.

NEW INSPECTION PROGRAMS

Intrusion Alarm · Video Surveillance · Camera Cleaning · Access Control · Intercom

Turn on the ones you sell in Settings, General. Each property gets a tab for the products it has: add the system, then its zones, cameras, recorders, UPS units, doors, gates or stations. Each service has its own schedule, fee, report and due date.

THE RIGHT WORD

An issue, not a deficiency

On these services a failed item is called an issue, because there is no life safety code behind it.

REVIEW AND REPORT

Head-end equipment by its own label

A recorder, a UPS or other head-end equipment is named by its own label, such as UPS 1, on the review page, the Dashboard and the report.

FIRE ALARM

System types, covers and a bigger library

Questions only for what the property has, and the equipment your technicians actually find.

NFPA 72

NFPA 72 system types

Each fire alarm system type comes with its NFPA 72 explanation one tap away, and the monitoring questions follow the type you choose.

PULL STATIONS

Pull station covers

Record whether a pull station has a cover, and which kind. Cover checks are asked only where one is fitted.

EQUIPMENT LIBRARY

202 more control panels

From Simplex, Edwards, Siemens, Bosch, Mircom, Hochiki, Napco, Fike, Gamewell FCI, Notifier, Fire-Lite, Potter, Silent Knight and Kidde, researched from the makers' own datasheets and manuals.

EQUIPMENT LIBRARY

200 more batteries

12V fire alarm batteries from 7Ah up to 110Ah, across 18 brands, the panel makers' own included. Technicians can add a missing battery from the phone, and an overdue battery due date shows in red.

OFFICE AND PHONE

In the office and on the phone

More ways to work the way you do.

Address suggestions

The company details form suggests the address as you type.

Done, next

The setup checklist moves you straight on to the next step.

Click a service to open it

Click a service on a property's Overview to open its tab.

History names the fields

History shows which fields were changed from the phone.

PHONE

Resolve a deficiency with no signal

On the phone, a technician can resolve a deficiency wherever they are standing, and it sends once the phone has signal again.

Thank you. To every company and technician who joined CodeGreen. Every feature in this document is included for every company. Questions: **support@codegreenitm.com**.
